

# International Travel

---

In November 2010, the University of Michigan developed a consolidated international travel website for all students, staff, and faculty called [M Global Michigan](#). A key component of this website is the [Travel Registry](#) which is a secure U-M website within Wolverine Access where students, staff, and faculty can record itinerary and contact information. The Registry is especially helpful for international travel. The Registry is a convenient, one-stop service that supports emergency communications, access to travel-abroad health insurance, and more. University faculty, staff, and students are expected to register when traveling abroad for academic, business or any other University-related purpose. In some cases, the University requires registration.

All students, staff, and faculty students should use [M Global Michigan](#) as the central information source for health, safety, and emergency preparedness regarding international travel.
